***Allowable Subject Matter***

5. Claims 23-49 are allowed.

As to independent claims 23 and 37, prior art does not disclose, teach or fairly suggest encoding a plurality of video frames to generate a compressed bitstream; that each transport packet has a fixed length and comprises (i) a header and (ii) a payload having data from the compressed bitstream; selecting every n-th transport packet in the stream of transport packets for scrambling processing, where n is a positive integer; in each selected transport packet, scrambling a first portion of the payload while leaving at least a second portion of the payload unscrambled to generate a corresponding scrambled transport packet; and transmitting a stream of transport packets having the generated scrambled transport packets from a transmitter of a conditional access system.

As to independent claims 38 and 49, prior art does not disclose, teach or fairly suggest that each transport packet has a fixed length and comprises (i) a header and (ii) a payload having data from the compressed bitstream; the compressed bitstream encodes a plurality of video frames; selecting every n-th transport packet in the stream of transport packets for descrambling processing, where n is a positive integer; in each selected transport packet, descrambling a first portion of the payload while not subjecting at least a second portion of the payload to

descrambling; and reconstructing the compressed bitstream using the descrambled first portions of the selected transport packets.

Any claims not directly addressed are allowed on the virtue of their dependency.
